Background

Singapore Management University (SMU)

Established in 2000, SMU's mission is to generate **leading-edge research with global impact** and to produce **broad-based, creative, and entrepreneurial leaders** for the knowledge-based economy.

SMU's education is known for its highly interactive, collaborative, and project-based approach to learning as well as its **wide range of undergraduate and postgraduate programmes** as well as **interdisciplinary combinations**

Home to over 12,000 students across undergraduate, postgraduate professional and postgraduate research programmes, SMU comprises eight schools:

- **College of Integrative Studies**
- **College of Graduate Research Studies**
- **School of Accountancy**
- **Lee Kong Chian School of Business**
- **School of Economics**
- **School of Computing and Information Systems**
- **Yong Pung How School of Law**
- **School of Social Sciences**

SMU Libraries – Li Ka Shing Library

SMU Libraries – Kwa Geok Choo Law Library

Quick Facts

- Over 900k visitors in 2022
- Open – 96 hours per week during term time
- Learning Commons – 24/7 hrs
- 2,300 seats and 10,700 sqm across 2 libraries
- Physical and virtual learning environments and services
- 38 staff – 22 professional librarians

Quick Facts

- Over 550,000 books (Over 480,000 e-books)
- 85,000+ electronic journals
- 170+ electronic databases
- Access to 34,000+ titles of streaming media
- > 6 million downloads from InK
- Print and electronic magazines and newspapers in lifestyle collection

Purpose

A digital preservation system for the university

SMU Libraries aims to develop a **centralized repository of digital materials** that captures the **culture, heritage & memories** of the University.

Opportunity to showcase achievements of the university through archives & history

Active collaborator to university-wide events & initiatives

Champion and establish expertise in digital preservation, curation, & archiving

Develop a collection of primary source materials that facilitate research

Capture unique educational and pedagogy heritage

Capabilities

Institutional Knowledge (Ink) Publication Repository

EXCERPTS

ABOUT

 **DOWNLOAD TRANSCRIPT**

I gave him a word of advice, publicly at last board meeting. I said, he will be at best a horse whisperer or cat whisperer. Not even a horse whisperer because academics are even less disciplined than horses, they are like a bunch of cats who think for themselves. Cats are very smart, smarter than dogs. But you cannot train a cat to do anything,

DPC Rapid Assessment Model

Digital Preservation Coalition Rapid Assessment Model (DPC RAM):
SMU Libraries May 2023

DPC Rapid Assessment Model

A - Organizational viability Governance, organizational structure, staffing and resourcing of digital preservation activities.	
0 - Minimal awareness	The organization has minimal awareness of the need to support digital preservation activities.
1 - Awareness	The organization is aware of the need to support digital preservation activities
2 - Basic	Digital preservation activities are supported and resourced at a basic level within the organization, for example: <ul style="list-style-type: none"> There is some engagement from senior management. Staff have assigned responsibilities and the time to undertake them. A budget for digital preservation has been allocated (may be time-limited). Staff development requirements have been identified.
3 - Managed	Digital preservation activities are managed and supported within the organization, for example: <ul style="list-style-type: none"> There is commitment from senior management. Responsibility for digital preservation is clearly owned. Staff have the skills they need to carry out digital preservation activities and access to relevant expertise where required. A dedicated core budget for digital preservation has been allocated. Budgets, staff roles and development needs are regularly assessed. Metrics and reports can be generated about the digital archive to help inform reporting, planning and management. Staff development requirements have been funded. Digital preservation has been identified as a strategic priority.
4 - Optimized	Digital preservation activities are proactively managed, enhanced and developed within the organization, for example: <ul style="list-style-type: none"> Benefits of digital preservation are recognized, championed and embedded throughout the organization. A cross-departmental digital preservation stakeholder group has been established.

B - Policy and strategy Policies, strategies, and procedures which govern the operation and management of the digital archive.	
0 - Minimal awareness	The organization has minimal awareness of the need for a policy framework for digital preservation.
1 - Awareness	The organization is aware of the need to develop a policy framework and may have some relevant policies but no digital preservation policy or strategy exists.
2 - Basic	The organization has a basic policy framework, for example: <ul style="list-style-type: none"> A high-level digital preservation policy or strategy exists. Other policies relating to digital preservation may exist but there are gaps in coverage. Some procedures for managing, and providing access to, digital content are in place and may be documented. Scope of collection is defined and understood (eg: collections development policy, retention schedule). Development of policy and procedure is informed by a basic understanding of user needs.
3 - Managed	The organization has a comprehensive and managed suite of policies, strategies and procedures, for example: <ul style="list-style-type: none"> The digital preservation policy/strategy is aligned with other organizational policies and is reviewed according to an agreed schedule. Policy and procedure takes into account any relevant ethical issues. A suite of documented processes and procedures for managing, and providing access to, content within the digital archive exists. All relevant staff are aware of digital preservation policies, strategies and procedures. Knowledge of current and future use cases for content informs policy and procedure (for example on collecting, preservation approaches, metadata and access).
	The organization proactively manages its policies, strategies and procedures and has a commitment to continuous process improvement, for example: <ul style="list-style-type: none"> A full suite of policies, strategies and procedures relating to the preservation of, and access to, digital

D - IT capability Information Technology capabilities for supporting digital preservation activities.	
0 - Minimal awareness	The organization has minimal awareness of either for IT capability to support the digital archive or basic principles for applying it.
1 - Awareness	The organization is aware of the need for IT capabilities to support the digital archive, and has an understanding of basic principles.
2 - Basic	The organization has access to basic IT facilities and technical infrastructure and support, for example: <ul style="list-style-type: none"> Basic IT support is available to the digital archive. Staff with IT responsibilities have a basic understanding of their role in supporting digital preservation. IT systems are documented at a basic level.
3 - Managed	The organization has access to comprehensively managed IT facilities including technical infrastructure and support, for example: <ul style="list-style-type: none"> Adequate IT support is available to the digital archive. IT roles and responsibilities relating to digital preservation are documented and regularly reviewed. IT systems are regularly patched and updated. New tools and systems are deployed when required. IT systems are comprehensively documented. Contracts and services with third party service providers (e.g. cloud suppliers) are well managed and documented.
4 - Optimized	The organization has access to proactively managed IT facilities that are continually evolving and improving, for example: <ul style="list-style-type: none"> An enhanced level of IT support is available to the digital archive. IT demonstrates good understanding of, and engagement with, digital preservation issues. Digital preservation requirements are taken into account when sourcing new IT systems. A detailed roadmap exists for future development of IT systems. Potential new tools and systems are proactively identified and tested.

Challenges

Key challenges

Policy formulation

Stakeholder engagement

Technical infrastructure

Policy formulation

- Existing collection policy <https://library.smu.edu.sg/about-us/library-policies-reports>
- Incorporating digital preservation into the policy
- Getting mandate at University level
- Identification of material sources and types
- Prioritisation and selection of materials
- Taxonomy development

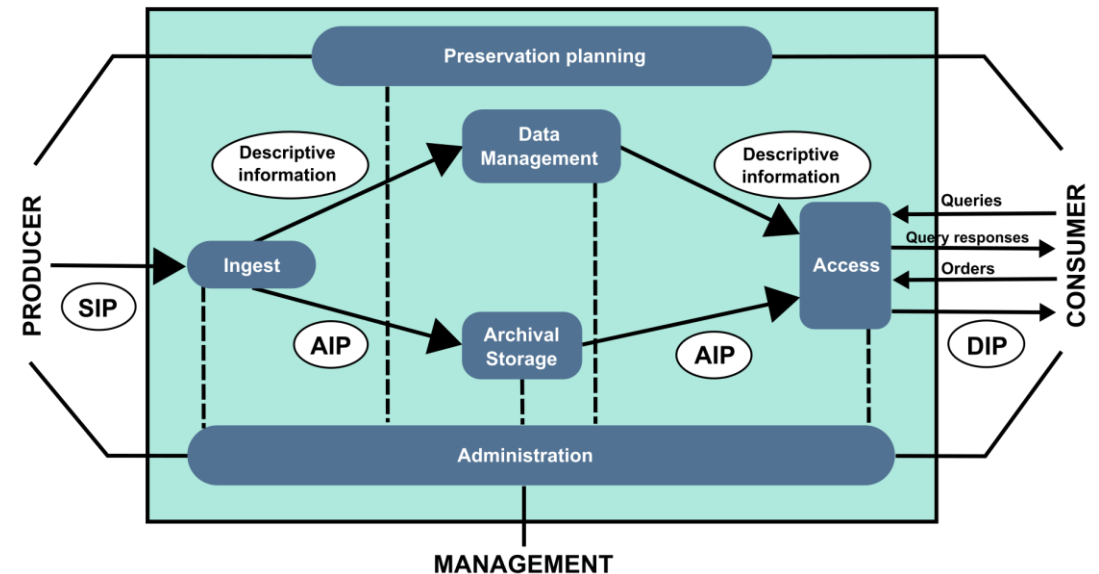

Stakeholder engagement

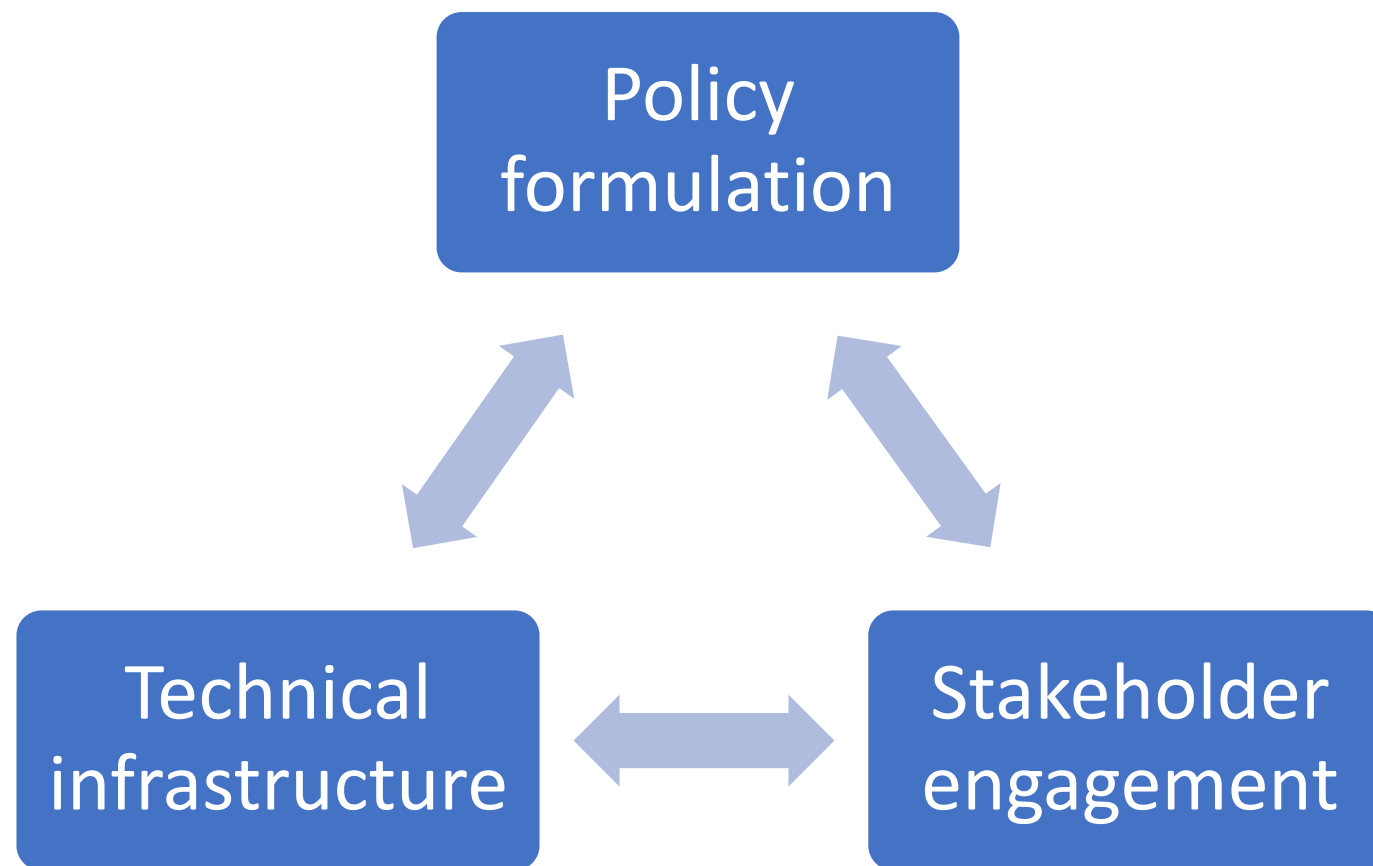

Technical infrastructure

- Annual IT project request exercise
- Compliance with campus IT policies
- Engagement and collaboration with campus IT management
- Open tender, evaluation phase

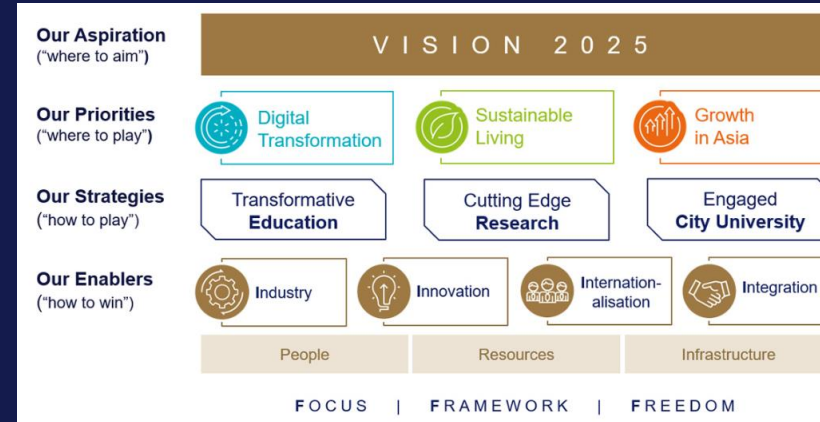

Key takeaways

Summary

- Background
- Purpose
- Capabilities
- Challenges
 - Policy formulation
 - Stakeholder engagement
 - Technical infrastructure

Thank you!
